Work Experience

Nine Years at Johnson O'Connor Research Foundation (JOCRF)

Primary responsibilities include aptitude testing, college and career guidance, training and research.
I started in our Dallas location in 2007 where I was quickly promoted to Assistant Lab Director, then in 2010 was asked to take over the Director position in Denver to resuscitate a failling office.

Accomplishments

- Developed prototype stopwatch application with scoring capabilities customized for individual tests.
- Currently spearheading a team tasked with writing requirements for a new research database and score reporting system.
- Increased testing volume in Denver by refocusing marketing efforts in Denver on key demographics and post-engagement contact.
- Designed a new concept for company website to encourage investement in an update.
- Collaborated with staff from Chicago and DC offices to develop research and statistical analysis training resources.
- Used Final Cut Pro to develop prototype training videos (complete with a blooper reel).
- Created a Keynote slideshow presentation that was adopted by the organization's Public Information Director and is used nationwide by other labs.

Education

Da Vinci Coders Javascript Bootcamp (2016)
Twelve week immersive course covering HTML/CSS/Javascript, jQuery, Backbone, and React

University of Missouri (2005)
BA in English
